Joint Interoperability and Integration and Joint Battle Management Command and Control Overview

Mr. Derganc
Director, Joint Interoperability and Integration
USJFCOM, J8
Authorities

• Unified Command Plan 2002 assigned USJFCOM joint force integration and the role of chief advocate for jointness and interoperability and integration

• DoD Directive 4630.5 and DoD Instruction 4630.8 assigned USJFCOM responsibility to provide operationally prioritized and programmatically synchronized materiel and non-materiel recommendations for resolving Combatant Commander warfighting shortfalls
Achieving Future Joint Force Integration

• Continuously work with Combatant Commanders, Services, and Agencies to identify joint interoperability requirements and standards

• Enforce interoperability through validation of DoD requirements documents for information exchange requirements and interoperability key performance parameters consistent with approved Joint Requirements Oversight Council joint operational concepts and integrated architectures
Addressing Legacy Joint Force Integration

- Identify and prioritize Combatant Commanders warfighting shortfalls from operational to tactical level
- Develop comprehensive Doctrinal, Organizational, Training, Materiel, Leadership, Personnel and Facilities (DOTMLPF) mission capability strategies
- Provide Rapid fielding of mission capable solutions via transition funds - bridge Service, Agency Program Objective Memorandum cycles
Specific Operational Focus

• Operational through tactical level joint integration of the following capabilities:
  ➢ Common operational and tactical pictures
  ➢ Combat identification
  ➢ Precision Engagement
  ➢ Situational awareness
  ➢ Adaptive mission planning and rehearsal
  ➢ Integrated service intelligence systems
  ➢ Integrated joint fires, maneuver, and intelligence
Provide needed capabilities to the joint warfighter

Approval of DOTMLPF solutions

Develop comprehensive DOTMLPF capability solutions and analysis of alternatives

ID capability shortfall issues from CCs

Rapid Transition of Capabilities
Recent Expanded Authorities

Deputy Secretary of Defense signed Management Initiative Decision #912 which directed expanded responsibilities for USJFCOM in overseeing and directing Joint Battle Management Command and Control (JBMC2) capabilities for joint integration and interoperability.
MID 912 Highlights

• Strengthens Departments fielding of Joint Battle Management Command and Control (BMC2) capability's

• USJFCOM shall lead Combatant Commanders in the development of joint doctrine, concepts, mission/capability area requirements for JBMC2

• USJFCOM shall coordinate JBMC2 capabilities with the Joint Requirements Oversight Council who will ensure efforts are synchronized with other Joint Mission Areas

• USJFCOM shall direct oversight and have directive authorities for selected DoD programs and initiatives
Joint BMC2 - Overview

• Component requirements and acquisition executives will work with USJFCOM to ensure all JBMC2 capabilities meet joint warfighter needs

• Military Departments and Defense Agencies shall retain responsibilities for programming and acquisition of JBMC2 capabilities
USJFCOM Initial JBMC2 Scope

- Fiscal Year 2003:
  - Deployable Joint Command and Control FY03
  - Single Integrated Air Picture Systems Engineering

- Fiscal Year 2004:
  - Family of Interoperable Operational Pictures
  - Developing SECDEF plan for expansion to:
    - Single Integrated Ground Picture
    - Single Integrated Maritime Picture
    - Precision Engagement/Time Sensitive Targeting
Top Level USJFCOM JBMC2 Processes

Activities

- Requirements
- Oversight Mgmt
- Engineering
- Joint Force SoS
- Joint Force Integration

Integrated products e.g.:

- Modified CRDs, ICDs, CDD
- Milestone Decision support
- Integrated budgets
- Specific oversight direction
- Mission performance assessments
- System of system trades
- Gap analysis
- Investment strategy
- SoS architecture
- Interface definitions
- Interoperability assessments
- Rapid prototyping w/ transition to operational capability

Leverage over existing processes (including OSD/JS/C/S/A interaction)

- REQT'S
- ACQ
- PPBS
- POLICY

Improved warfighter outcomes:

- Joint integrated capability, increasing effectiveness
- Improved allocation of scarce resources
- Interoperability
- Shorter time to deliver improved capability
USJFCOM JBMC2 Requirements Overview

- Prioritize Combatant Commander needs
- Develop, review, and validate joint doctrine, concepts, mission area/capability requirements, and integrated architectures
- In conjunction with Combatant Commands, Services and Agencies, organize, train, and equip joint forces and provide integrated capabilities to joint warfighters
USJFCOM JBMC2 Requirements Oversight

- Chaired by USJFCOM J8 with reps from Combatant Commanders, Services and Agencies
- Provide oversight of JBMC2 concepts, operational requirements, and operational architectures
- Facilitate implementing emerging joint experimentation concepts leading to future JBMC2 mission area/capability requirements
USJFCOM JBMC2 Capability Requirements Process

ID new / emergent capability concepts and requirements from JE, CCs, exercises, world events

Develop joint capability requirement recommendations

Requirements oversight endorse JBMC2 Reqt’s recommendations

JROC process
USJFCOM JBMC2 Functions

- Conduct field experiments and prototyping
- Assess capabilities exercises
- Oversight of systems and “SoS” testing
- Ensure field and operational training
- Plan transition strategy and fielding
- Perform SoS capability trade-offs
- Review mission/capability area requirements
- Perform assessments and lessons learned
USJFCOM JBMC2 Oversight Functions

• Assess and direct synchronization, SoS integration, and capability dependency across Combatant Commands, Services and Agencies

• Provide input and direction to Service and Agency POMs, and participate in PPBS decisions

• Execute cost and budget oversight and analyses and provide oversight and directive input to issue resolution

• Participate in acquisition (milestone) decisions
