Evidence about the Benefits of CMMI®: What’s Next?

Moderator: Dennis Goldenson, SEI
Panelists: David Herron, The David Consulting Group
          Tom McGibbon, Data Analysis Center for Software
          Lynn Penn, Lockheed Martin IS&S
Discussant: Terry Rout, Griffith University Australia

Enhancing Quality & Quantity of the Evidence

More & better case studies are not enough

More broadly based sample needed to attribute results to CMMI based processes *versus* other factors / unintended measurement effects

Need for a viable benchmarking infrastructure & community of practice
  • In a field where people aren't comfortable sharing information

Measurement, validation, data quality & analytic methods

Bottom line: Actionable guidance using measurement to inform better decisions
