PM MEFFV is:

- the USMC’s focal point for coordination and integration of USMC activities related to the Army’s Future Combat Systems

- responsible for development, acquisition, and life-cycle management of Active Protection Systems “B Kits” for application on current force platforms (LAVs, AAVs, etc.)
FCS Coordination Focus Areas:

- Achieving FCS network and MAGTF C2 synchronization in support of the Joint C2 functional concept
- Joint IPT established, developing Joint CONOPs
- Leveraging FCS technologies for USMC use through assessment of Spin Outs
- Technology transition agreements; USMC has adopted Intelligent Munitions Systems
- Assessing the suitability of FCS platforms (UAVs, UGVs, MGVs) for USMC use
- Developing ICD for future MEFFV vehicles (to replace LAV family and M1A1s)
Active Protection Systems:

- APS provides hard kill capability to defeat incoming RPG threat for lightly armored vehicles (LAVs and AAVs; potential for EFV);

- conducting market research and initial requirements development work for anticipated FY08 new start

- monitoring Army development program for Stryker and FCS

- monitoring coalition development efforts
