"CREATIVE ACQUISITION TO COMBAT
EXISTING AND EMERGING WORLD THREATS
THROUGH STATE-OF-THE-ART
DECONTAMINATION AND PROTECTION"

CONFERENCE INFORMATION

The Joint Project Managers for Decontamination (JPM-DECON), Collective and Individual Protection (JPM-CP and JPM-IP), the Joint Program Executive Office for Chemical and Biological Defense (JPEO-CBD), and the National Defense Industrial Association (NDIA) announce the 2007 Joint Chemical-Biological Decontamination and Protection Conference & Exhibition at the Virginia Beach Convention Center in Virginia Beach, VA. This year's theme is "Creative Acquisition to Combat Existing and Emerging World Threats Through State-of-the-Art Decontamination and Protection".

The challenge in combating existing and emerging world threats is to ensure that our warfighters and state/local first responders are adequately equipped to overcome any terrorist threat on the battlefield, at fixed sites, and in our communities. We would like to invite participation from state, local and federal government agencies, industry, academia, foreign representatives, first responders, and warfighters to join the program offices that develop protection, and decontamination equipment to enable sustainment operations.

Conference Objective:

The objective of this event is to provide a global forum for the exchange of information and ideas related to the successes and challenges experienced while improving Nuclear, Biological, and Chemical decontamination and protection in support of Department of Defense requirements. This event is open to federal government agencies, industry, academia, foreign representatives, and state/local first responders.
