“ Perception”

CSC
EXPERIENCE. RESULTS.

Top Risks

- **Inability to align business areas, map processes, etc.**
  - **Doable for individual functions—hard for enterprise**
  - **“Culture change” is tougher than technical challenge**
- **Inconsistent Data Quality**
  - **“Garbage in—gospel out”**
  - **Conflicting standards, limited ownership, no incentives**
- **Scope Creep**
  - **Change management (volume of “tweaks” / requests)**
  - **Increased requirements (time / $ / resources)**

Critical for Success

- **Operational, System, Technical Architecture**
  - **Process (Activities / Procedures)**
  - **Framework (Structure)**
- **Visualization**
  - **Access / Timely / Context**
- **Networked Enterprise**
  - **Linkage / synchronization (End-to-End)**
  - **Availability / Permission based access**
- **Correct Performance Metrics**
- **Governance**
  - **Compliance (procedures / security)**
  - **Authority / assessment / accountability**
