Transforming Distribution

- **Acquisition**: Research, Development, Test and Evaluation
- **Storage**: DLA/Services
- **Inter-Theater Movement**: USTRANSCOM
- **Theater Stock Positioning & Movement**: COCOMs/DLA/Services
- **Tactical Movement and Distribution**:
  - **Vendor/PBL Distribution Activities**
  - **DPO Span of Influence**
    - Synchronize Logistics Information Systems
    - Achieve End to End Visibility
    - Enterprise Infrastructure
    - Coordinate Vendor Activities
    - Align Distribution Processes
The image contains a diagram titled "DISTRIBUTION PROCESS OWNER VISION." The diagram illustrates the process of capability sourcing, identification, tracking, movement, delivery, joint effects, redeployment, and retrograde. It is designed to mature the Joint Deployment Distribution Enterprise, focusing on effective resource management and distribution across various components and sectors such as forces, bases, SPOD, APOD, SPOE, APOE, Sustainment, ISB, Svc Component Handoff Points, DLA TDC Fwd Stocks, Sea Basing, JFC, and GSA. The diagram emphasizes the sequential steps from capability identification to delivery and beyond, highlighting the integration of different sectors to achieve a cohesive deployment and distribution strategy.
DPFM FOCUS AREAS RELATED TO VISION

Command & Control (C2) Fusion Center

Common Operational Picture for Deployment and Distribution (COP D2)

Integrated Data Environment (IDE) / Global Transportation Network (GTN) Convergence (IGC)

Platform Management

Single Port Operations System

Redeployment Retrograde

JFC

SPOD APOD SPOE APOE

Forces (Services/JFCOM)

National Resources

COCOM

JFC Sustainment

DLA TDC

Theater Distribution Management

Joint Effects

Capability Identified

Capability Sourced

Capability Moved

Capability Tracked

Capability Delivered

Sea Basing

Fwd Stocks

Industry

Capability Sourced

Svc Component Handoff Points

Redeploy

Retrograde
