Waging the long War on Terrorism

MAJOR GENERAL BENOIT PUGA
SPECIAL OPERATIONS COMMANDER, FRANCE

18th NDIA SO/LIC SYMPOSIUM, WASHINGTON – FEBRUARY 2007
Undetectable enemy
Using conventional and non conventional means
Combining classical and non classical actions

Fire power, advanced technology and traditional courses of actions are no longer sufficient.

An enemy that often has the initiative
Interoperability
Industrial reactivity
Capacity to adapt
Unpredictable and unstable environment
The political success is now reached during the consolidation phase.
Interoperability
security concern
force protection
population a major stake
monitor local security forces
win the peace
destabilize the enemy
confidentiality

New data to be considered
Thinking war and the way to do it differently
Special Forces trained and equipped to do otherwise
Conventional forces

To secure the operational area

High value targets
• High sensitive targets
• seeking for more interoperability
• mastering capabilities / adapted technology
• intelligence / man in the loop / reliable sensors
• capability to upgrade both procedures and equipment as quickly as possible
• special human intell assets
• sharing information
Conclusion
