Progress in Army Reserve Logistics

- Implementing logistics program that directly supports the Army Force Generation (ARFORGEN) model.
- Provided Rapid Fielding Initiative equipment to 62,000 Army Reserve Soldiers
- Integrated 7,014 pieces of equipment transferred from the Active Component to the Army Reserve.
- Identified \$742 million of Army Reserve stay-behind equipment retained in Iraq for replacement (such as HMMWVs, Trucks, Material Handling Equipment and communication equipment).

Equipping an Operational Reserve

- The modernization of light-medium trucks (75 percent are not Modular Force compatible or deployable and are not integral to training and operational efficiency).
- The modernization of medium line-haul tractors (50 percent do not support single-fleet policy and are not integral to training and operational efficiency).
- Modular Force equipment needed to support designated individual and collective training locations, including unit level collective training in a field environment.

Equipping an Operational Army Reserve

- Sustainment Issues:
 - Fully fund FY2013 force structure, including replacement of battle and attritional losses due to Operation Iraqi Freedom/Operation Enduring Freedom and the increased training tempo.
 - Recapitalize tactical truck inventory.
 - Retain Army Reserve tactical maintenance contract labor to reduce mobilization and training equipment backlogs.

Equipment Shortfalls *Army Reserve Solution:*

- Implementing Equipment Campaign Plan to work NGREA
- Continuing to execute \$92.0M for Depot Rebuild
- Implementing new Army Reserve Equipping Strategy
- Outsourcing Maintenance
