Command, Control and Interoperability

Mission
Through a practitioner-driven approach, the Command, Control and Interoperability Division (CID) creates and deploys information resources to enable seamless and secure interactions among homeland security stakeholders.

Vision
Stakeholders have comprehensive, real-time, and relevant information to create and maintain a secure and safe Nation.
CID Division Organization

Managed by the Department of Homeland Security’s (DHS) Science and Technology Directorate, CID delivers on its mission through five thrust areas.
CID: Interoperability Customers

• Coordinates with primary customers:
  • DHS Protection & Programs Directorate
  • Federal Emergency Management Agency
  • Department of Justice
  • Customs and Border Protection
  • National Communications System
  • U.S. Coast Guard
  • U.S. Secret Service
  • Immigration and Customs Enforcement
  • Transportation Security Administration

• Directs initiatives to end users:
  More than 60,000 emergency response agencies nationwide, state homeland security officials, and policy makers at the local, tribal, state, and Federal levels
