Vision Statement and Objectives for Enterprise Data Management

**Vision** - Evolve data management (DM) to reflect an enterprise level data-centric culture.

**Objectives**

1. Proactive involvement as a stakeholder in the definition of the enterprise architecture as well as addressing evolving product, program, and data lifecycles
2. Implementation flexibility in DM processes to leverage emerging technology capabilities such as model-based project management and engineering
3. Provide application-independent data assets, data strings, and information
Plan Forward

1. Utilize the wiki as a tool to capture, collaborate, and publish products.
2. Establish a steering group to provide focus, leadership, and wiki moderation.
3. Establish a working group to address relevant topics over the next 12-18 months.
4. Decompose the broad objectives into short-term prioritized products and tasks.
5. Recognize and address challenges.
6. Define a strategy to fulfill the vision (strategic plan).
Steering Group

Roles -
1. Facilitate and establish business processes for the working group
2. Assign moderators for wiki content
3. Prioritize development activities

Members:
1. Boeing_AL - Eddie Letson
2. PEO Missiles & Space_AL – Michael Fulkerson
3. Boeing_AL – Bob Burdeshaw
4. MSFC/NASA_AL – Kandy Hayden
5. BAE Systems_NH – Larry DesSureault??
