Introduction to Commercialization at U.S. Department of Homeland Security

2009 Homeland Security Symposium & Exhibition
September 9-10, 2009

Thomas A. Cellucci, Ph.D., MBA
Chief Commercialization Officer
Department of Homeland Security
Email: Thomas.Cellucci@dhs.gov
Website: http://bit.ly/commercializationresources
Discussion Guide

• Commercialization Office Overview
• Commercialization Activities at DHS
• SECURE™ and FutureTECH™ Public-Private Partnerships
• Highlights
• Summary
Mission:
To develop and execute programs and processes that identify, evaluate and commercialize technologies that result in widely-distributed products or services that meet the operational requirements of the Department of Homeland Security’s operating components, first responders, critical infrastructure/key resources owners and operators and other stakeholders.

Why Commercialization?
The Private Sector is willing and able to use its own money, resources, expertise and experience to develop and produce fully developed products and services for DHS. The Private Sector wants/needs two things from DHS: 1. Detailed Operational Requirements; and 2. a Conservative Estimate of the Potential Available Markets.

Question:
Should DHS solely develop S&T (and products) through an Acquisition Process -- even though DHS’ budget is far less than DoD’s and DHS has something much more valuable than DoD to offer the Private Sector-- substantial Potential Available Markets?
Commercialization Office: Major Activities

**Requirements Development Initiative**
- Requirements Development Book(s)
- Operational Requirements Document Template
- Training for end users and engineers

**Commercialization Process**
- “Hybrid” Commercialization Model
- Product Realization Chart
- Commercialization Framework and “Mindset”

**Public-Private Partnerships**
- FutureTECH™ (TRL 1-6)
- SECURE™ (TRL 5-9)
- Concept of Operations
- Website Development
- Internal processes developed and socialized
- Requirements and Conservative Potential Market Available Estimates Communicated

**Private Sector Outreach**
- Invited Speeches
- Meetings with business executives
- Numerous articles written and published regarding observations and programs in practice.
- Repository of currently available products, services and/or technologies in the private sector aligned to Capstone IPT Capability Gaps

Performance is King

Relationship between users and product developer is usually remote

Hybrid Commercialization Process

Pure Commercialization
1. Requirements derived by Private Sector
2. Product development funded by the developer (incentivizes short intervals)
3. Technical performance secondary (often reduced in favor of price)
4. Focus on price point
5. Product price is market-based
6. Product reaches users via marketing and sales channels

Performance/Price is King

Relationship between end users and product developer is crucial

“Commercialization” – The process of developing markets and producing and delivering products or services for sale.
Transition Approaches

- Capstone IPTs
  - Identify
  - Capability
  - Gaps/Mission
  - Needs

TRANITION PATH

- DHS Component Acquisition
- Provide Solutions
- Validates Grants & Equipment
- Enables Procurement

- Field Agents
- First Responder
- Private Sector

Widely Distributed Product
## Critical Infrastructure Key Resources (CIKR)

SECURE™ Program
Developing Solutions in Partnership with the Private Sector

• ‘Win-Win-Win” Public-Private Partnership program benefits DHS’s stakeholders, private sector and –most importantly- the American Taxpayer

• Saves time and money on product development costs leveraging the free-market system and encouraging the development of widely distributed products for DHS’s stakeholders

• Detailed articulation of requirements (using MD 102-01 ORD template) and T&E review provides assurance to DHS, First Responders and private sector users (like CIKR) that products/services perform as prescribed

http://www.dhs.gov/xres/programs/gc_1211996620526.shtm
FutureTECH™ Program
Addressing the Future Needs of DHS

• ‘Win-Win-Win’ Public-Private Partnership program benefits DHS stakeholders, private sector and –most importantly- the American Taxpayer

• 5W template provides detailed overview of Critical Research/Innovation Focus Areas

• Critical Research/Innovation Focus Areas provide universities, national labs and private sector R&D organizations insight into the future needs of DHS stakeholders

• Partnership program encourages R&D organizations to work on development of technology solutions up to TRL-6 to address long-term DHS needs.

Commercialization Office Highlights:

• White House Office of Science and Technology Policy briefings (Chief Technology Officer Aneesh Chopra)

• Homeland Security Council: Recommended priority for FY11-15 for transportation security: SECURE Program

• Council on Competitiveness, Chief Commercialization Officer is first Federal Government Representative

• “Big Bang Economics”: CNN Feature Video with Jeanne Meserve

• Two Federal Certification Programs developed and implemented—SECURE™ and FutureTECH™: Innovative public-private partnerships

• Published Five books (and more than 20 articles) on requirements development and public-private partnerships

• Commercialization Office websites have highest number of page visits and longest dwell time (over 17 minutes) of all S&T Directorate websites
Summary

- Commercialization can be viewed as a “Win-Win-Win” approach to developing capabilities for DHS stakeholders
- Innovative public-private partnerships offer alternative to traditional Acquisition activities at “Obtain” phase
- Increase speed-of-execution and net realizable budget for DHS, extendable to other federal agencies
Questions and Answers
Dr. Cellucci accepted a five-year appointment from the Department of Homeland Security in August 2007 as the Federal Government’s first Chief Commercialization Officer (CCO). He is responsible for initiatives that identify, evaluate and commercialize technology for the specific goal of rapidly developing and deploying products and services that meet the specific operational requirements of the Department of Homeland Security’s Operating Components and other DHS stakeholders such as First Responders and Critical Infrastructure/Key Resources owners and operators. Cellucci has also developed and continues to drive the implementation of DHS-S&T’s outreach with the private sector to establish and foster mutually beneficial working relationships to facilitate cost-effective and efficient product/service development efforts. His efforts led to the establishment of the DHS-S&T Commercialization Office in October 2008. The Commercialization Office is responsible for four major activities; a requirements development initiative for all DHS stakeholders, the development and implementation of a commercialization process for DHS, development and execution of private sector partnership programs such as SECURE and leading the private sector outreach for the S&T directorate.

Since his appointment, he has published three comprehensive guides [Requirements Development Guide (April 2008), Developing Operational Requirements (May 2008), and Developing Operational Requirements, Version 2 (November 2008)] dealing with the development of operational requirements, developed and implemented a commercialization model for the entire department and established the SECURE Program—an innovative public-private partnership to cost-effectively and efficiently develop products and services for DHS’s Operating Components and other DHS stakeholders. In addition, he has written over 25 articles and a compilation of works [Harnessing the Valuable Experiences and Resources of the Private Sector for the Public Good, (February 2009)] geared toward the private sector to inform the public of new opportunities and ways to work with DHS. Cellucci has received recognition for his outreach efforts and engagement with the small and disadvantaged business communities who learn about potential business opportunities and avenues to provide DHS with critical technologies and products to help secure America.

Cellucci is an accomplished entrepreneur, seasoned senior executive and Board member possessing extensive corporate and VC experience across a number of worldwide industries. Profitably growing high technology firms at the start-up, mid-range and large corporate level has been his trademark. He has authored or co-authored over 139 articles on Requirements development, Commercialization, Nanotechnology, Laser physics, Photonics, Environmental disturbance control, MEMS test and measurement, and Mistake-proofing enterprise software. He has also held the rank of Lecturer or Professor at institutions like Princeton University, University of Pennsylvania and Camden Community College. Cellucci also co-authored ANSI Standard Z136.5 “The Safe Use of Lasers in Educational Institutions”. Dr. Cellucci is also a commissioned Admiral and Commander of a Squadron in Texas responsible for civil defense and has been a first responder for over twenty years. As a result of his consistent achievement in the commercialization of technologies, Cellucci has received numerous awards and citations from industry, government and business. In addition, he has significant experience interacting with high ranking members of the United States government—including the White House, US Senate and US House of Representatives—having provided executive briefs to three Presidents of the United States and ranking members of Congress. Cellucci represents DHS as the first Federal Government member on the U.S. Council on Competitiveness.

Cellucci earned a PhD in Physical Chemistry from the University of Pennsylvania, an MBA from Rutgers University and a BS in Chemistry from Fordham University. He has also attended and lectured at executive programs at the Harvard Business School, MIT Sloan School, Kellogg School and others. Dr. Cellucci is regarded as an authority in rapid time-to-market new product development and is regularly asked to serve as keynote speaker at both business and technical events.
