EProcurement first rollout sometime in 2011
How DLA Will Buy In The Future EProcurement

• E-Procurement will integrate procurement functional capabilities and result in an enterprise-wide contracting system
• Supports the assumption of the Depot Level Reparable contracting function
• Incremental deployment tentatively planned for FY09 through FY11
• No impacts are anticipated to DLA’s suppliers
• Minor enhancements to DIBBs to include a Post Award Request (PAR) processing that will allow vendors to submit PARS (modification requests, etc) via DIBBS which will be routed to E-Procurement
Before You Can Sell To DLA

The DLA-BSM Internet Bid Board System (DIBBS) is a web-based application that provides the capability to search for, view, and submit secure quotes on Requests for Quotations (RFQs) for items of supply included in the DLA Business System Modernization (BSM) Program. DIBBS also allows users to search and view Request for Proposals (RFPs), Invitations For Bid (IFBs), Awards and other procurement information related to BSM.

The BSM NSN/FSC Query Database can be used to determine if a particular National Stock Number (NSN) or Federal Supply Class (FSC) is included in the BSM Program. Beginning in November 2004, DLA will bring additional items and users into BSM during regularly sequenced rollouts. Information will be provided on these items as it becomes available. Additional information is available at the BSM Supplier Information Resource Center.
