TACLAN

SIPR Rack Cases | Front

Network Case:
Estimated Total Weight: 175 lbs
Cisco 1000-4000 Switch
Hard Panel
Hardyge FA 3204
Tripp-Lite RTM
Piercing M Rack Case

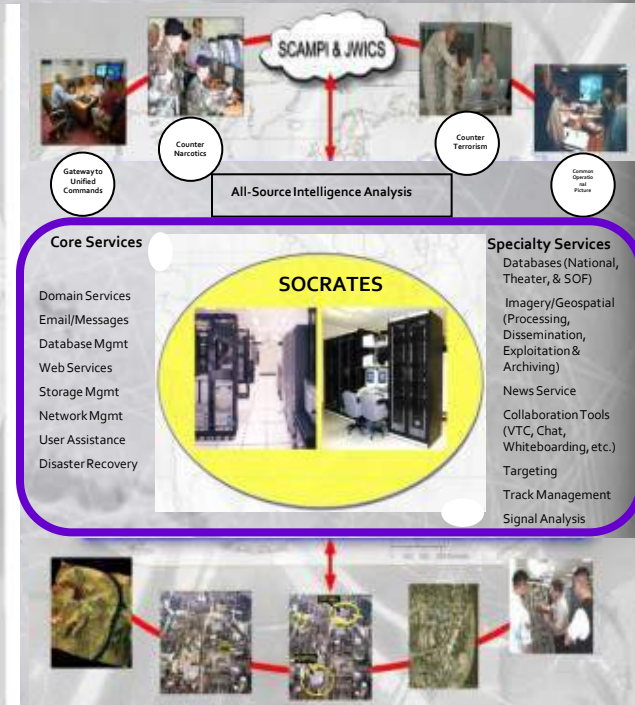

Server/Storage Case 1:
Estimated Total Weight: 100 lbs
Dell R910 Server
Tripp-Lite Power Strip
Net App FA 3204 Dual
Hard Panel
Piercing M Rack Case

UPS Case 1:
Estimated Total Weight: 100 lbs
Hard Panel
Tripp-Lite RTM
Piercing M Rack Case

C4IAS

SOCRATES

Technology Areas of Interest

- **Service consolidation and delivery with high availability**
- **Physical infrastructure consolidation & virtualization**
- **Centralized enterprise storage management and dynamic storage allocation**
- **Web based application delivery and thin client technologies**
- **Single wire (network infrastructure) multiple security classifications**

Technology Challenges

- **Type 1 Wireless Encryption that supports a minimum of 100 Mbps**
- **Cross domain SABI; TS Wireless; High Availability**
- **Data at Rest in tactical environments**
- **Developing secure WiFi/WiMax tactical cloud for mobile computing in tactical environments**
- **Multi-level security**

Future Technology Needs

- **Service Delivery Technology**
 - WAN acceleration technologies
 - Enterprise management tools
- **Infrastructure Consolidation**
 - Data reduction/de-duplication technologies
 - Storage density technologies
 - Infrastructure consolidation technologies
- **Storage Management Technologies**
 - Storage Virtualization
 - Management Tools That Provide Significant Capabilities Over Existing Toolset

Future Technology Needs

- **Web Based Application Delivery**
 - WAN Caching and Acceleration Technologies
 - Management Tools
- **Single Network Infrastructure**
 - Distributed storage technologies

UNCLASSIFIED

Special Operations Forces

Industry Conference

MISO / CA Division Chief

C4 COMMAND, CONTROL, COMMUNICATIONS, AND COMPUTERS

UNCLASSIFIED

MISO/CA Program Families

Fly Away Broadcast System (FABS) V2

Broadcast Support Vehicle (BSV)

Broadcast Systems

Print (MISOP Light/Med/Heavy)

Product Distribution System (PDS)

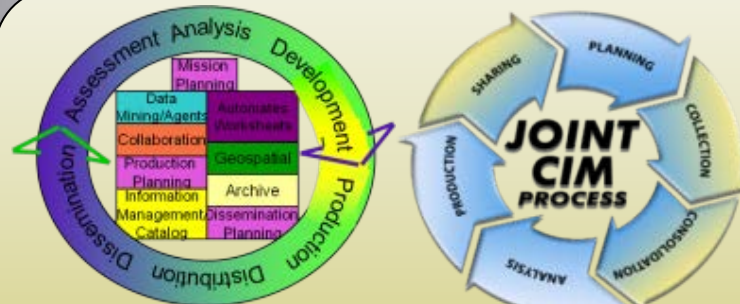

Dismounted

Mounted Next Generation Loudspeakers (NGLS)

Media Production Center (MPC)

MISO Enterprise

CIMDPS

MPC-Light MPC-Medium

MISO Broadcast System

Current System

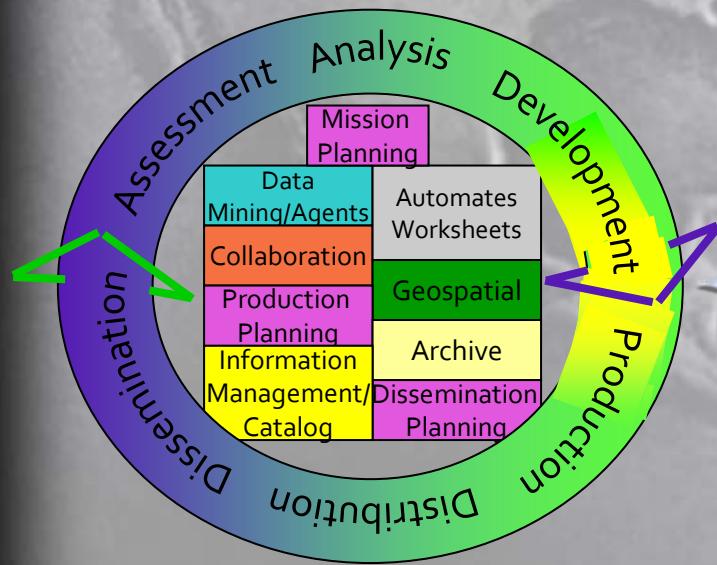

Fly Away Broadcast System (FABS) FABS V2

Future Needs

- Man Transportable AM Antenna To Support Broadcast Ranges
 - AM 30 Miles

MISO Enterprise System and Civil Information Management Data Processing System (CIMDPS)

MISO Enterprise System

CIMDPS

Future Needs

- Advanced Algorithms for Cognitive Science and Applications in:
 - Trends and Themes Over Time
 - Data Mining
 - Behavior Modeling
 - Natural Language Processing
 - Measures of Effectiveness
