CASCOM - Mission and Vision

**Mission**

CASCOM trains and educates Soldiers and Civilians, develops and integrates capabilities, concepts and doctrine, and executes functional proponency to enable the Army’s Sustainment Warfighting Function.

**Vision**

Support Starts Here! CASCOM commands the Army’s Sustainment Center of Excellence…the premier team of committed and innovative professionals who provide unrivaled sustainment capabilities to meet the needs of our Army.

**CASCOM Core Competencies**

1. Conduct Initial Military Training
2. Train and Educate Sustainment Leaders
3. **Develop and Integrate Capabilities**
4. Execute Functional Proponency
What CASCOM Does

- We train Soldiers and educate Leaders.
- We assess their capabilities and find ways to improve them.
- We organize these Soldiers into units.
- We write “how to” doctrine to guide them.
- **We develop future materiel requirements.**
- We focus Army R&D investments on the right solutions.

Over 1/3 of Today’s Army relies on us to enable them to remain Army Strong!
Mission: Develop a White Paper defining a vision for a common distribution concept in support of Unified Operations 2012-2028.

Intent: Support multiple future Operational Environments in support of Combined Arms Maneuver and Wide Area Security Missions and inspire buy-in across entire stakeholder community.

End State: Achieve a better understanding of potential distribution technologies and initiatives that can fundamentally change the way Operators and Sustainers do business. Influence/inform proponent combat developments and set the conditions for future thought and development.
TWV Long Term Protection Strategy (LTPS)

Description

• Provides an estimate of B-Kit requirements based on the Army TWV Strategy.
• Identifies appropriate armor and non-armor solutions to mitigate risk as validated in the TRADOC G2 System Threat Assessment Report (STAR).
• Assists Army Materiel Command in developing a plan for B-Kit storage, maintenance, installation, and transportation.
The 2009 and 2010 TWV Reduction Studies I and II identified ~22,000 TWVs for reduction
- TWV I focused on the 8 brigade formations
- TWV II focused on Echelon above brigade formations.

ARCIC completed TWV III which was a TDA focused study and identified ~2,100 TWVs for reduction.

The Army can be expected to continue to reduce requirements through the Total Army Analysis (TAA) process as well as TRADOC efforts as we design the Army of 2020
What I Want to Leave You With

- **Vehicles With Worldwide Capability:** We will leave the desert environment!

- What I Want to Leave You With
  - The Army is going to significantly reduce the numbers of Tactical Wheeled Vehicles.
