

SPECIAL OPERATIONS FORCES INDUSTRY CONFERENCE

Ms. Lisa Sanders
Director

SCIENCE AND TECHNOLOGY

SCIENCE AND TECHNOLOGY

TECHNICAL EXPERIMENTATION (TE)

- USSOCOM's Science and Technology Directorate conducts TE events throughout the year to rapidly assess technology maturity based on USSOCOM Components / Theater Special Operations Commands (TSOCs) identified areas of need
- Typically, three annual events are held at various installations in CONUS and each have operational themes to capture broad technology areas of interest

SCIENCE AND TECHNOLOGY

PARTICIPATION & SCOPE

- Participants at the TE events include: SOF operators, Government technology subject matter experts, and technology developers — including industry, academia, and research labs
- Observers at TE events may be DoD and Other Government Agencies
- A typical TE event features approximately 65 separate experiments

PAYOFFs

- For participating technology developers:
 - Interact with SOF operators in a field environment
 - Identify solutions to high-priority SOF needs
 - Assess the maturity or potential military application of a wide variety of technologies
 - Collaborate with other developers
- For observers:
 - Provides an opportunity to discover new and innovative technical solutions
