NATO Weapons & Sensors Working Group
Update to the NDIA Joint Armaments Forum
May 14, 2014

Barton H. Halpern, Ph.D.
Chairman

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited
For NATO Interoperability is the issue Based on 2011 Deployments

- 42 Nations have forces in Afghanistan
- 25 of these are members of LCG DSS developing Dismounted Soldier capabilities.

- Standardization: The development and implementation of concepts, doctrines, procedures and designs in order to achieve and maintain the compatibility, interchangeability or commonality which are necessary to attain the required level of interoperability, or to optimise the use of resources, in the fields of operations, materiel and administration.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited
Three Levels of Standardization

AAP 6

Three Levels

- **Compatibility**: The suitability of products, processes or services for use together under specific conditions to fulfil relevant requirements without causing unacceptable interactions (04 Oct 2000).
- **Interchangeability**: The ability of one product, process or service to be used in place of another to fulfil the same requirements (04 Oct 2000).
- **Commonality**: The state achieved when the same doctrine, procedures or equipment are used (04 Oct 2000).

**OUR GOAL is:**

- **Interoperability**: is the ability to act together coherently, effectively and efficiently to achieve Allied tactical, operational and strategic objectives (03 Dec 09)

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited
NAAG Structure 2012, **Major Non-Entitled Groups** (*)

(* Groups are in no specific order

**DISTRIBUTION STATEMENT A:** Approved for public release; distribution is unlimited
ToR for Weapons & Sensors WG

- The group is responsible for all issues related to dismountable soldier's weapon systems, grenades and shoulder launched and guided anti-tank weapons, as well as dedicated sensors (including, but not limited to day and night sights, laser designators, tactical lights and fire control systems).

- **The group is responsible for training equipment as associated with our ToR equipment**

- The weapon system includes the weapon itself, different types of ammunition and the dedicated accessories.

- The group is also responsible for the interface of the weapons and sensors with the various other parts of the soldier system.
How is standardization done?

• At least 12 nations have to be interested.
• A ToE is formed.
• They will develop a draft STANAG.
• This will be presented to the main group.
• It will be approved under a ”silence procedure” (SP).
• The STANAG will then be sent to the NATO Standardization Agency (NSA) for ratification and implementation by the nations.
• Currently there are approx 1400 STANAG’s.
Current work regarding W&S STANAG’s (2014)

- **STANREC 4498 ED2 “Soldier Systems Representative Targets, Helicopters and Unarmored Vehicles”.** DEU lead. Approved by LCGDSS. Endorsed by NAAG. NSA reports that Promulgation Date 17-10-2013 (Action Closed)

- **STANREC 4536 ED2 “Soldier Systems Representative Targets, Unfortified and Fortified Structures”.** NLD lead. Approved by LCGDSS. Endorsed by NAAG. NSA reports that Promulgation Date 17-10-2013. Spain provided additional information. (WITHOUT BREAKING OF SILENCE PROCEDURE). W&S will incorporate these comments during the next update of the STANREC
Current work regarding W&S STANAG’s (2014)

• **STANAG 4512** “Dismounted Personnel Targets” – Need new Volunteer to update this STANAG. Last update was on 2004-04-06.

• **STANAG 4513** “Incapacitation & Suppression” (GBR). GBR will provide the W&S group a draft update at the October 2014 meeting

• **STANAG 4740** NATO Powered Rail - Closed: AC/225-D(2014)0002 under silence 14 March, covering AEP-90
Current Team Of Experts - D/14

- **D/14 Team of Experts** - The purpose of this ToE is to update the D/14 NATO Small Arms Test Manual. The manual was jointly written in the 1960s by Belgium, France, Germany, Netherlands, United Kingdom and United States. The Manual was completely revised in the early 1970s by an international group of experts to define a series of assessment tests for small arms weapons and ammunitions. These tests are to assess the performance characteristics against agreed NATO requirements.
- Currently outdated
- 13 Countries are participating in the rewrite of this document
Current Team Of Experts – Suppressors

• Why a ToE on Suppressors?
• More NATO nations are now interested in the performance of weapon suppressors than ever before
• Recognised lack of standards for determining the full system level effectiveness of suppressors
• Simultaneous standardisation of all aspects would be too big, although all nations are working on methodologies.
• The first one to tackle (simplest!) Acoustic signature.
Acoustic signature measurement

- Most common approach MIL-STD-1474D (or themes there of)
- Although other similar methods are available.
- Recognised that none are optimised for Suppressor evaluation:
  - In the near field (repeatability)
  - Close to the ground or indoors (reflections)
  - NIHL focus (detection and environmental noise pollution)
  - Rendering down to simplistic MOPS (no frequency data)
- D14 Annex M attempt to provide method
- Develop robust standard considering practicalities
- 8 countries are actively participating in this ToE
Current Team Of Experts – G/3 MG Cone

- Why a ToE on G/3 MG Cone?
- Multiple NATO Nations have experienced significant mechanical failures of the G/3 MG pintle
- Those nations are involving industry to help create a standardized design for interoperability
Current NATO D/7 Manual Update

- D/7 Update: NATO requirements for Weapons and Sensors post 2025 draft reviewed for comments.
  
  • Current draft includes future requirements for the:
    
    - PDW: Handgun, Submachine gun, Assault rifle
    - Precision weapon: Medium range (<800m), Long range (>800m), Anti-materiel
    - Machine gun: Light (5.56), Medium (7.62), Heavy (12.7)
    - Grenade launcher: Shoulder fired, Automatic
    - Shotgun
    - **Weapon enablers**: Close combat sights, Telescopic sights, Range finders, Fire control systems, Image intensifiers (I²), Thermal weapon sights, Fused night vision sights, Weapon flashlights, Laser aiming and illuminators, Observer target acquisition system
Current NATO D/7 Manual Update

– D/7 Update: NATO requirements for Weapons and Sensors post 2025 draft reviewed for 1st comments.
  • Current draft includes future requirements for the:
    – **Weapon accessories**: Bayonets, Bipods, Suppressors, Shot counters, Slings
    – **Training accessories**: Blank firing adapters, Laser Training systems, Paint marking systems, Short range training systems
    – **Future technological approach chapter**: to be added to propose revolutionary new approaches and capability.
W&S meetings (since the Fall 2013 meeting of LCGDSS):

Main Body:
• **Adelaide** (AUS): 17-19 Feb 2014 - 28 delegates from 13 countries
• **Prague**: Oct 2014
• **Spring 2015 (Canada)**

D/14 ToE
• **Adelaide** (AUS): 19 - 20 Feb 2014 - 26 delegates from 13 countries
• **Spain**: 24th to 26th June 2014
• **Prague**: Oct 2014
• **Spring 2015 Canada**
• 3 others in 2015

G3 ToE
• **Adelaide** (AUS): 19 Feb 2014 - 26 delegates from 13 countries
• **Olso**: May 2014
• **Prague**: Oct 2014
• **Spring 2015 Canada**
W&S meetings (since the Fall 2013 meeting of LCGDSS (cont)):

Suppressor ToE

- **VTC**: 17 Dec 2013 - 18 delegates from 8 countries
- **Henderson (USA)**: 13-15 Jan 2014 - 17 delegates from 8 countries also with 9 Industry Leaders
- **VTC**: 8 April 2014
- **Spain or Germany**: 24th to 26th June 2014
- **Naval Surface Warfare Centre, Crane, Indiana (USA)**: Sept 2014
- **Prague**: Oct 2014
- **VTC**: Nov 2014
- **Norway (Tromso?)**: Jan 2015
National updates

- Our information exchange has shown that many nations have similar programs.
- Many nations are:
  - Facing budget cuts and delayed upgrades
  - Upgrading their Equipment (see Matrices)
  - Are experiencing the same reliability issues (More comments to follow)
## Ongoing and Future Programs Matrix

CCO = Close Combat Optics  
GL FCS = Grenade Launcher Fire Control System  
LAM = Laser Aiming Module
JSSAP Investment into Common Capability

- Supporting the mission of NATO with manpower and SME
- Participating in multiple ToE and at multiple echelons
- Representing the Warfighter
- Ensuring our Warfighters have the Capabilities they need
