NDIA

Improving Global Expeditionary Capabilities: Joint Providers

Lt Gen Andy Busch
Director
Defense Logistics Agency
April 20, 2016
Synchronizing Global Expeditionary Capabilities

DLA provides significant support for every CCDR...our relationship with USTRANSCOM is special and unique because of the interrelationships of our processes  
*DLA Director’s Intent, July 2015*

As future conflicts become increasingly dynamic, U.S. forces must have the agility to respond quickly, across traditional regional boundaries with a variety of strategic capabilities  
*Gen McDew, HASC Subcommittee on Readiness, March 2016*

Because of lessons learned from Operation United Assistance, and subsequent joint exercises, we partnered with DLA to integrate their Rapid Deployment Initiative (RDI) into our JTF-PO capability to provide rapid initial theater distribution support to the supported Geographic Combatant Commander (GCC)  
*Gen McDew, HASC Subcommittee on Readiness, March 2016*
USTC/DLA: Joint Providers Improving Global Expeditionary Capabilities
