Building and Maintaining Readiness

Tactical Wheeled Vehicle Conference
10 May 2016
Topics

- Priorities and the Lines of Effort
- Setting Conditions for Ready Formations
  - Modernization
  - Production to Sustainment
  - Our Capabilities
    - CBM/CBM+
Army G-4 Lines of Effort

**LOE #1 LEADER DEVELOPMENT**

**CAMPAIGN OBJECTIVE**
Army sustainment leaders who adapt to the challenges posed by a complex future environment. They are creative, forward thinking, and bold in envisioning how we do business and how we institute solutions.

**LOE #2 STRATEGIC READINESS**

**CAMPAIGN OBJECTIVE**
The Army sustainment community is resourced and capable of **sustaining Joint combined arms operations over contested LOCs in austere environments** in order to maintain operational reach and endurance.

**LOE #3 ARMY OPERATING CONCEPT / FORCE 2025**

**CAMPAIGN OBJECTIVE**
The Army sustainment community unifies Army logistics processes; strengthens partnerships across the Joint and DoD communities; advances the logistics mission across both warfighting and business domains; and maintains the highest quality workforce.

---

**How to Maintain and Generate Combat Power**
Setting the Conditions

- How we Modernize
  - Commonality
  - Cascade or Divest in Stride
  - Exploit Advanced Manufacturing
  - Reduce the Cycle Time
    - Requirement to Production to Sustainment
- Help Us be a Better Customer!
Setting the Conditions

☐ Our Capabilities – *Able to Sustain Ourselves*  

*(without CLS)*

☐ Manage and Operate the Supply Chain  
☐ Soldiers Trained and Able to Maintain  
☐ Ability to Control Our Cost to Train and Operate  
☐ Reliability Growth
Condition Based Maintenance (+)

- Objectives:
  - Commander’s Drive Operational Availability (Prognostics)
  - Shorten the NMC to FMC Cycle Time (Diagnostics)
  - Trigger the Supply Chain (Tactical and National)

- Means:
  - Onboard Sensors, Collectors
  - Data to Point of Decision/Action
    - Store and Forward
  - Analytical Engine
  - Tied to GCSS-Army
Questions & Discussion
