Real-time Immersive Audio for Realistic Training

Dave Fluegeman, VP, Simulation
Thomas Huisman, Product Manager

22 August, 2018
Introducing *Object-based, Real-time Audio Processing*

Object-based sound means:

- It positions sound correctly relative to the trainee’s position and object’s behavior in 3D space \((x,y,z)\).

- No sweet spot.

- Independent of speaker setup.
