# Introduction

## Space Domain Lead

**Carnegie Mellon University**  
Software Engineering Institute

Expertise spanning over twenty-eight years in software engineering with focus on Digital Engineering, DevSecOps, and Agile building large complex solutions across multiple domains from submarines to satellites. She advocates for continuous learning with multiple certifications including SAFe Fellow, SPCT, CEC, PMP, PMI-ACP, and CSEP. She is a Systems Engineering PhD candidate at Colorado State researching best practices to deliver complex safety critical solutions using Agile and DevSecOps.

# Agenda

- Objectives
- Background
- The First Way
- The Second Way
- The Third Way
- Benefits / Challenges
- Conclusion

# Objectives

- ❑ Situational Awareness of Phoenix Project and The Three ways
- ❑ Provide an understanding of why these concepts should be applied beyond software
- ❑ Demonstrate examples of how to apply three ways at system level

# Background

Gene Kim 2013

**Systems Thinking / Flow**

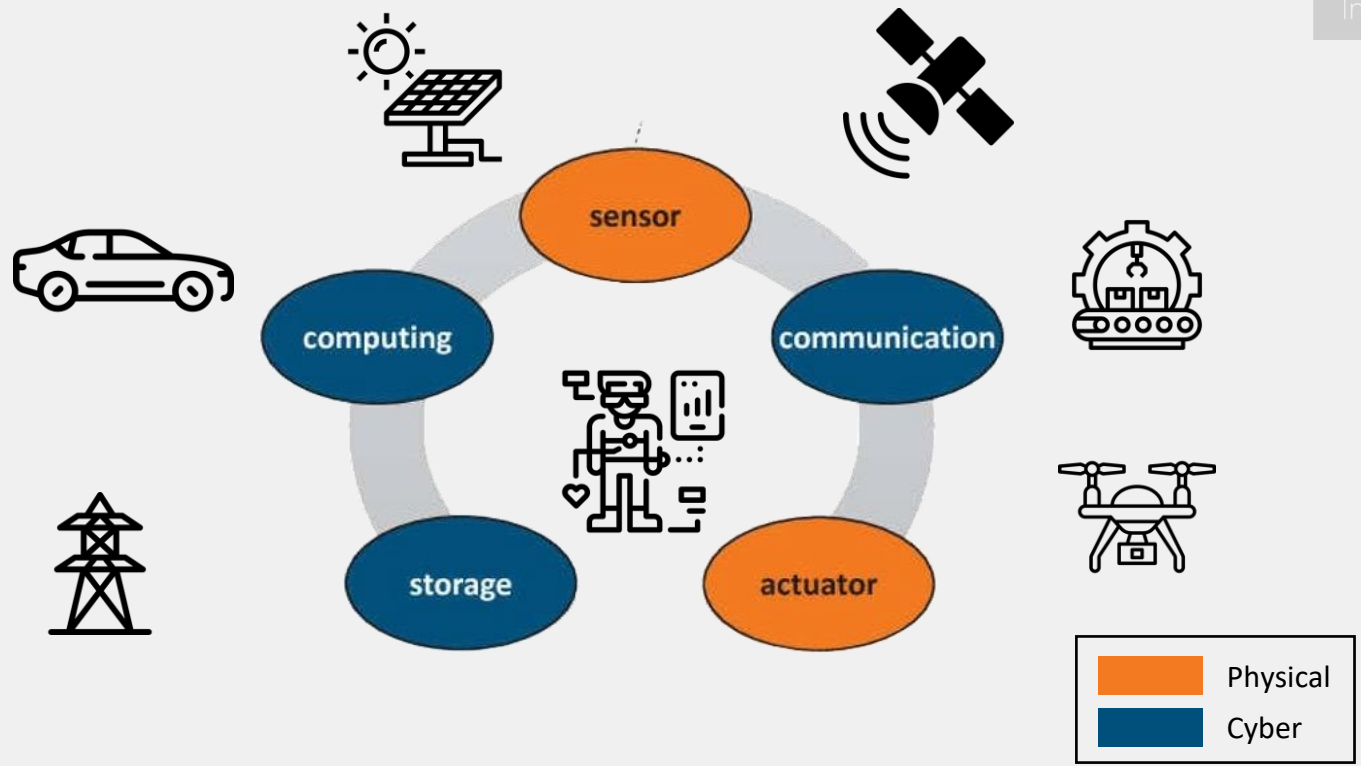

**Amplify Feedback Loops**

**Culture of Continuous Learning**

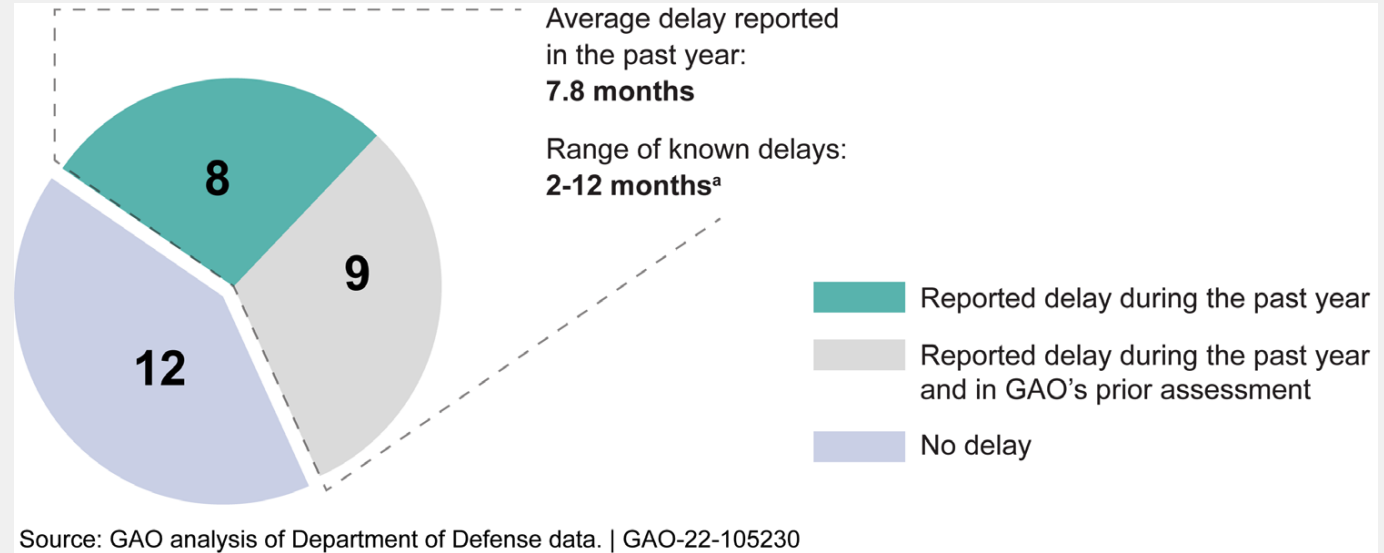

# Cyber-Physical System (CPS)

Most of these systems are software defined and hardware enabled

# What is the problem

*Can we apply the Three ways to major weapon systems and get similar benefits that we find in software?*

# The First Way

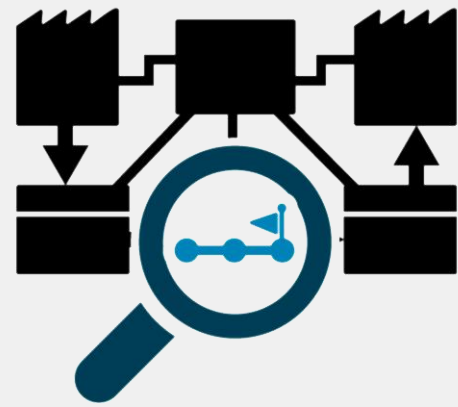

## Dev

## Ops

A holistic view that emphasizes the performance of the entire system as opposed to a specific silo or department while ensuring we do not pass defects downstream.

Look at the systems  
As a whole

Visualize flow of value

# The Second Way

The second ways focus on getting feedback quickly, fail-fast / Learn-fast

Test-Driven

Digital Twin

# The Third Way

Creating an environment of innovation and continuous learning

Ensure the teams  
have clarity and  
competence

Psychological  
Safety

# Benefits

- Increased Quality
- Enhanced resilience and security
- Shorter lead times
- Reduced cost
- Increased transparency
- Faster Innovation

# Challenges / Considerations

- Awareness
- Organizational Structure
- Culture
- Regulatory Compliance

# Revisit Objectives

- ✓  Situational Awareness of Phoenix Project and The Three ways
- ✓  Provide an understanding of why these concepts should be applied beyond software
- ✓  Demonstrate examples of how to apply

# Q & A

ASK AWAY!
